## PRICE INDICATOR OF MARINE PRODUCTS EXPORT

ISSN - 0971 - 3239

Vol. No. XXXVIII/26

(Weekly Indicative C & F prices in US\$)

27-06-2014

### A. JAPAN

#### MARKET SITUATION

**Shrimp:** Consumption still remain very sluggish, especially for B.T. Due to high price of shrimp, hotel/restaurants/ super markets chains prefer cheaper items, such as chicken, salmon etc. Heavy stock of Argentine shrimp makes the domestic market situation more complex. Importers express optimism that situation may change by July. The decrease in vannamei prices has prompted importers to renegotiate on orders. The agents are also marketing actively for Argentine shrimp, which now has poor public demand despite low price and discount sales. Better supply of vannamei and B.T. at cheaper rates can bring back public demand for shrimp, thereby increasing consumption positively influencing imports into the Japanese market.

**Octopus:** High contract price of Octopus in Africa will influence octopus market price in Japan.

**Surimi:** Due to increase of Surimi price, final products of Surimi or items such as fish sausage, Crab imitation, Kamaboko etc. have seen an increase in the price. One major company increased the prices by 5 to 16.7 % .

Supply position of Surimi has been better this year, though the much demanded threadfin bream Surimi is in short supply. Hence, processors are forced to deal Surimi from other species.

**Skipjack:** Skipjack price is also up in accordance with price up of Bangkok, Thailand.

## B. USA

### MARKET SITUATION

**31-35 through 71-90 count Latin American HLSO shrimp** offerings adjust slightly lower. The market is mixed with some offerings noted lower than listed levels but with an about steady undertone.

**16-20 count Asians HLSO white shrimp** are full steady with some offering noted higher. The balance of the market is about steady at listed levels.

**Value-added white shrimp** are about steady. As raw material pricing has increased for overseas processors, their offerings have moved to an unsettled position from what have been fairly weak offerings in relation to the US spot market. The undertone for the current spot market is unsettled as overseas conditions continue to develop.

**Black tiger shrimp** are generally steady at listed levels with a few lower offerings noted on any size to stimulate buying interest.

Renewed interest in headless shell-on shrimp from the Gulf region has become price supportive. Reports suggest that inventories in the supply chain are limited, and those buyers looking to replenish are now seeing more stock-outs and allocations from suppliers. Meanwhile, most count PUD and 41-50 and smaller count P&D values continue to quickly and sharply erode. In addition to the recent opening of the Louisiana inshore shrimp season a few weeks ago, the Mississippi and Alabama seasons officially opened Wednesday, June 18.
